1. Bug Title

Campaign title text is overlapping and not fully visible on Permanent Campaign cards

URL

<https://shjc.sharjah.ae/permanentcampaigns/13>

Screen/Page

Permanent Campaigns / Medical Campaign Cards

Description

On the Permanent Campaigns page, the campaign card title is not displaying properly. The title text is overlapping with other elements/icons on the card and is cut off from the right side. Because of this, users cannot clearly read the full campaign name.

This issue is visible on the first campaign card where the title appears as:

“Case (19): Sister Umm Mahmoud urgently needs a lun...”

The remaining text is hidden or overlapped.

Steps to Reproduce

1. Open the Permanent Campaigns page using the URL:
<https://shjc.sharjah.ae/permanentcampaigns/13/...>
2. View the campaign cards displayed on the page.
3. Check the title area of the first campaign card.
4. Observe the alignment of the campaign title text with the icons/buttons on the card.
5. Verify whether the full title is readable.

Actual Result

- Campaign title is not fully visible.
- Text is cut off/hidden from the right side.
- Title overlaps with the card icons/buttons.
- User cannot clearly read the complete campaign name.
- Card UI looks broken and unprofessional.

Expected Result

- Campaign title should be displayed properly without overlapping.
- Full campaign title should either fit inside the card or show proper ellipsis with tooltip/read more option.
- Icons/buttons should not cover or overlap the title text.
- Card layout should remain clean and readable on all screen sizes.

Severity

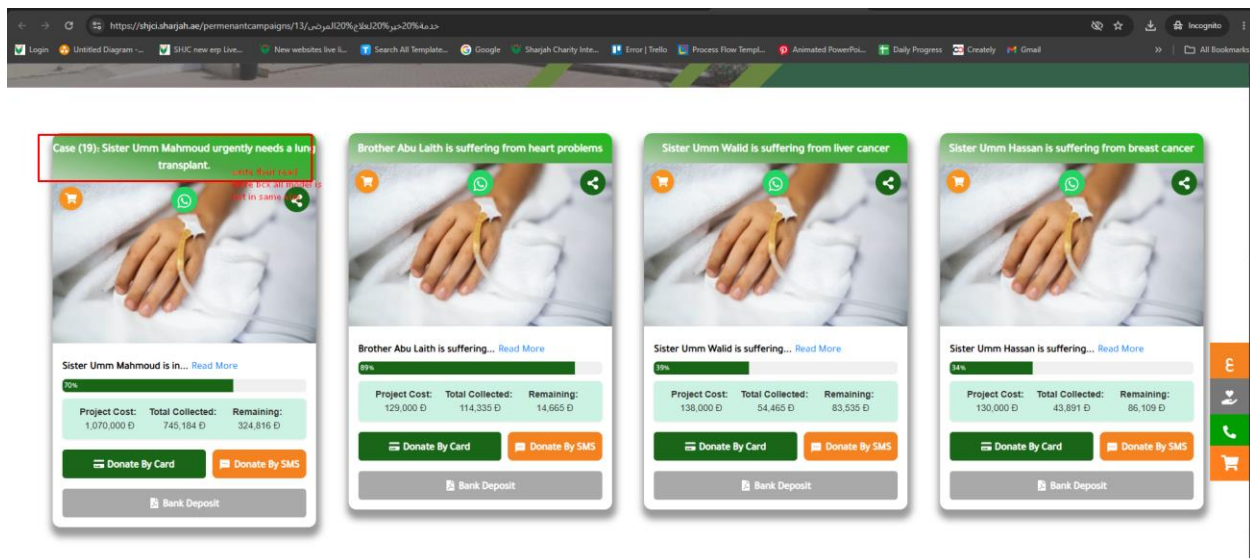

Medium – UI issue affects readability and user experience.

Priority

Medium

Module

Permanent Campaigns / Campaign Listing / Medical Campaign Cards

2. Bug Title

Phone number field layout is broken and input area/button overlaps on Dirham Al Hamad registration section

URL

<https://shjc.sharjah.ae/dirhamalhamad>

Screen/Page

Dirham Al Hamad / Donate By SMS Registration Section

Description

On the **Dirham Al Hamad** page, when the user opens the phone number registration section, the phone number input field layout is not displaying properly.

The green phone/submit button appears inside or very close to the input field, and the blank input area is misaligned. This creates confusion for the user and affects the registration process.

Steps to Reproduce

1. Open the Dirham Al Hamad page using this URL:
<https://shjc.sharjah.ae/dirhamalhamd>
2. Scroll to the donation options section.
3. Click or view the **By Sms** section.
4. Check the area below this text:
Please enter the phone number for registration:
5. Observe the phone number input field and green button placement.

Actual Result

- Phone number input field is not aligned properly.
- The green button/icon appears misplaced inside the input area.
- The input field design looks broken.
- User may not clearly understand where to enter the phone number or where to click.

Expected Result

- Phone number input field should display properly in one clean row.
- Green button should be properly aligned beside the phone number field.
- No overlap or extra blank space should appear.
- User should be able to enter the phone number and submit/register without confusion.

Severity

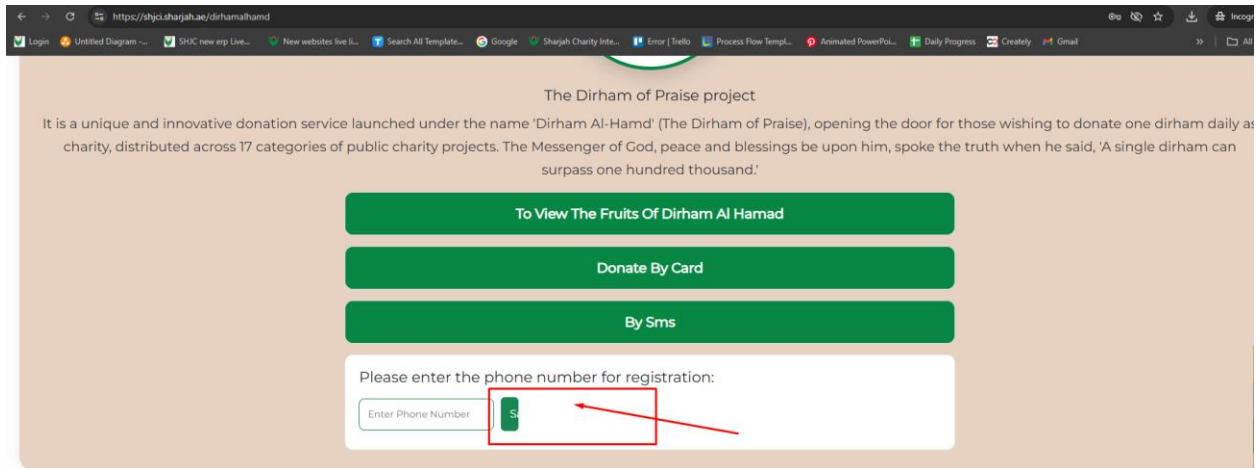

Medium – UI issue affects user experience and may confuse users during SMS registration.

Priority

Medium

Module

Dirham Al Hamad / SMS Registration / Donation

3. Bug Title

Checkout button remains disabled after adding cart item and entering user information

URL

<http://10.10.100.15:8019/sayqajoud>

Screen/Page

Soqya Joud / Water Donation Checkout Page

Description

When the user adds a water package to the cart and fills the required user information such as phone number, name, email, location, and masjid, the **Check Out** button remains disabled/greyed out. The user is unable to proceed with checkout even though the cart contains items and required information appears to be filled.

Steps to Reproduce

1. Open the Soqya Joud page using this URL:
<http://10.10.100.15:8019/sayqajoud>
2. Select any available water package.
3. Increase the quantity to the required minimum quantity.
4. Click **Add To Cart**.
5. Verify that the selected item appears in the **Cart Items** section.
6. Enter the user information:
 - Phone Number
 - Name
 - Email
 - Location
 - Masjid
7. Check the **Grand Total** amount.
8. Observe the **Check Out** button.

Actual Result

- Item is added successfully to the cart.
- Cart total and grand total are displayed correctly.
- User information fields are filled.
- However, the **Check Out** button remains disabled/greyed out.
- User cannot proceed to payment or checkout.

Expected Result

- After adding the item to the cart and filling all required user information, the **Check Out** button should become active.
- User should be able to click **Check Out**.
- System should proceed to the next checkout/payment step.
- If any required field is missing or invalid, system should show a clear validation message.

Severity

High – User cannot complete the donation/order process.

Priority

High

Soqya Joud / Water Donation / Checkout

The screenshot displays the checkout interface for 'Soqya Joud' water donations. It features three product cards, each showing a water bottle and its pricing. The 'Cart Items' section lists the items added to the cart. The 'User Information' section contains fields for Phone Number, Name, Email, Location, and Masjid, all of which are filled. The 'Check Out' button is disabled (greyed out). The 'Grand Total' is 104 D.

Product	Unit Price	Unit Quantity	Total
Soqya joud 500ml x 12	4 D	1	4 D
Soqya joud 200ml x 24	8 D	13	104 D
Soqya joud 330ml x 12	4 D	1	4 D

4. Bug Title

Copy link icon is not clickable in Money Box share popup

URL

<http://10.10.100.15:8019/moneybox>

Screen/Page

Money Box / Share Popup

Description

When the user clicks the **Share** button for a Money Box, a share popup opens with multiple sharing options such as copy link, WhatsApp, Facebook, Twitter, and email. However, the **copy link icon** is not working. It is not clickable and does not copy the Money Box link.

Steps to Reproduce

1. Open the Money Box page using this URL:
<http://10.10.100.15:8019/moneybox>
2. Search or open the required Money Box record.
3. Click on the **Share** button.
4. The share popup will open.
5. Click on the **copy link icon** shown in the popup.
6. Observe whether the link is copied or any confirmation message appears.

Actual Result

- Share popup opens successfully.
- Copy link icon is visible.
- Copy link icon is not clickable.
- No link is copied to clipboard.
- No success or error message is displayed.
- User cannot copy and share the Money Box link manually.

Expected Result

- Copy link icon should be clickable.
- When user clicks the copy link icon, the Money Box link should be copied to clipboard.
- System should show a confirmation message such as:
“**Link copied successfully.**”
- User should be able to paste and share the copied link with others.

Severity

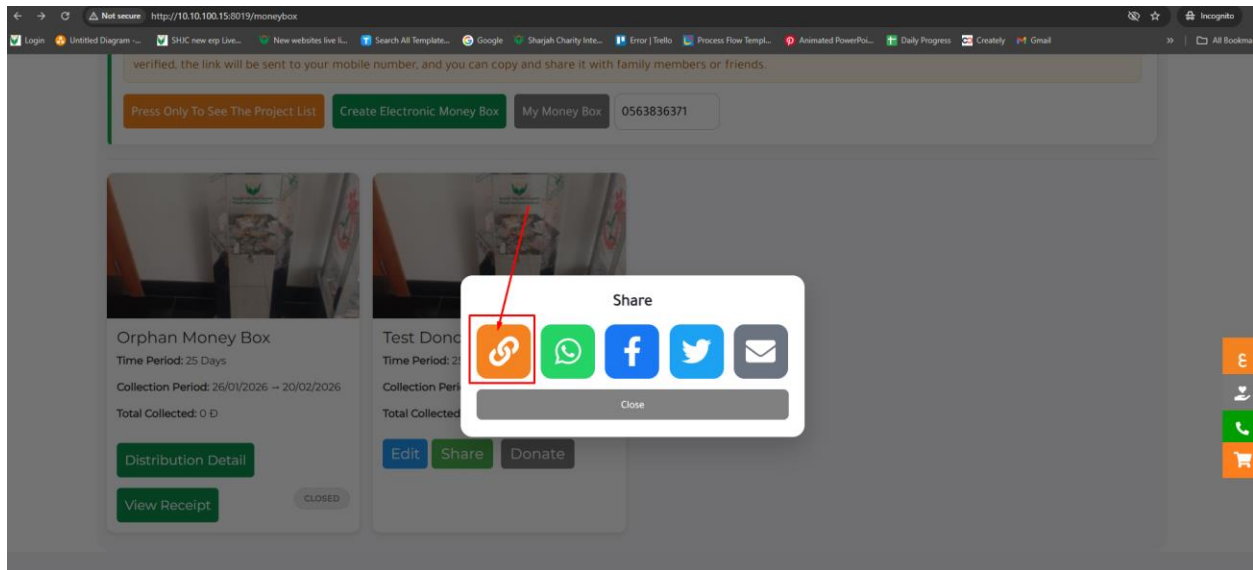

Medium – Share functionality is partially affected because users cannot copy the link.

Priority

Medium

Module

Money Box / Share Feature

5. Bug Title

Samsung Pay payment option image/icon is broken on Money Box donation popup

URL

<http://10.10.100.15:8019/shareproject?t=...>

Screen/Page

Money Box / Project Details / Donation Payment Popup

Description

When the user opens the shared Money Box donation page and enters donor details, the payment options are displayed at the bottom of the popup.

However, the **Samsung Pay** option is not displaying properly. Instead of showing the Samsung Pay icon/image clearly, a broken or missing image placeholder appears.

Steps to Reproduce

1. Open the shared Money Box donation URL:
<http://10.10.100.15:8019/shareproject?t=...>
2. Click or open the donation/project details popup.
3. Enter donor details:
 - Donor Name
 - Amount
 - Phone Number

4. Check the payment options section at the bottom of the popup.
5. Observe the **Samsung Pay** payment option.

Actual Result

- Project Details popup opens successfully.
- Donor information fields are visible.
- Other payment options/icons are displaying properly.
- **Samsung Pay image/icon is broken or not loading.**
- User cannot clearly identify the Samsung Pay payment option.

Expected Result

- Samsung Pay icon/image should display properly.
- All payment options should have clear and consistent icons.
- No broken image placeholder should appear.
- User should be able to identify and select Samsung Pay easily.

Severity

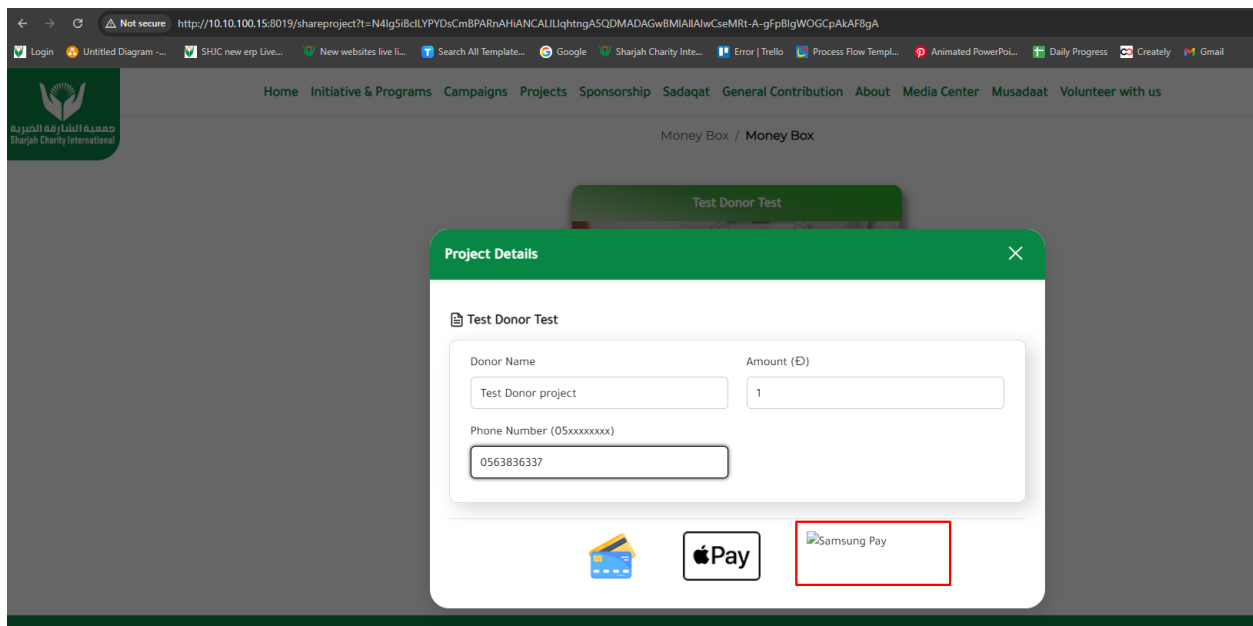

Medium – Payment option UI is affected and may confuse users during donation payment.

Priority

Money Box / Donation / Payment Options

6. Bug Title

Payment failed due to connection refused error on Money Box donation payment popup

URL

<http://10.10.100.15:8019/shareproject?t=...>

Screen/Page

Money Box / Project Details / Donation Payment Popup

Description

When the user opens the shared Money Box donation page and enters the donor details, the system shows a payment error message while trying to process the payment.
The error displayed is:

Payment Failed: connect ECONNREFUSED 10.10.100.15:8049

This means the payment service/API endpoint is not reachable or the backend payment service is refusing the connection.

Steps to Reproduce

1. Open the shared Money Box donation URL:
<http://10.10.100.15:8019/shareproject?t=...>
2. Open the **Project Details** donation popup.
3. Enter donor details:
 - Donor Name
 - Amount
 - Phone Number
4. Select a payment method, such as card payment.
5. Try to proceed with the payment.
6. Observe the error message displayed on the popup.

Actual Result

- Donation popup opens successfully.
- Donor information fields are displayed.
- Payment methods are visible.
- When user tries to proceed with payment, system displays:
Payment Failed: connect ECONNREFUSED 10.10.100.15:8049
- User cannot complete the donation payment.

Expected Result

- Payment service should connect successfully.
- User should be redirected to the payment gateway or payment process should continue.

- No connection refused error should appear.
- If payment service is unavailable, system should show a proper user-friendly message, such as: **“Payment service is temporarily unavailable. Please try again later.”**

Severity

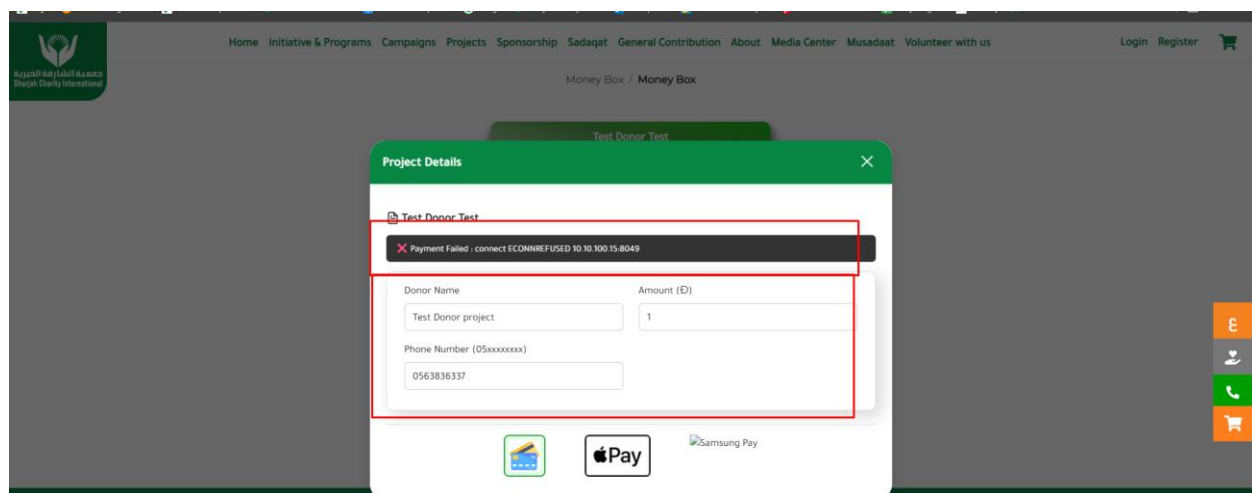

Critical – User cannot complete the donation payment.

Priority

High

Module

Money Box / Donation / Payment Gateway

7. Bug Title

Phone call floating icon is visible on desktop website and opens mobile app prompt

URL

<https://shjc.sharjah.ae>

Screen/Page

Home Page / Floating Contact Icons

Description

On the desktop version of the website, the **phone call floating icon** is visible on the right side of the screen. When the user clicks the phone icon from a PC/laptop browser, the browser displays an **“Open Pick an app?”** popup because the system tries to open a phone calling application.

This phone call icon should only be visible on mobile devices where users can directly make a call. On desktop/PC, this icon should be hidden or handled differently.

Steps to Reproduce

1. Open the website on a desktop/laptop browser:
<https://shjc.sharjah.ae>
2. Check the floating icons on the right side of the page.
3. Click the **phone call icon**.
4. Observe the browser popup.

Actual Result

- Phone call icon is visible on desktop website.
- When clicked, browser shows “**Open Pick an app?**” popup.
- User is asked to open an external app for calling.
- This behavior is not suitable for desktop users.

Expected Result

- Phone call icon should be hidden on desktop/PC view.
- Phone call icon should display only on mobile/responsive view.
- On mobile, clicking the icon should open the dialer/call option properly.
- Desktop users should not see unnecessary app-opening popup.

Suggested Fix

Apply responsive/device-based condition:

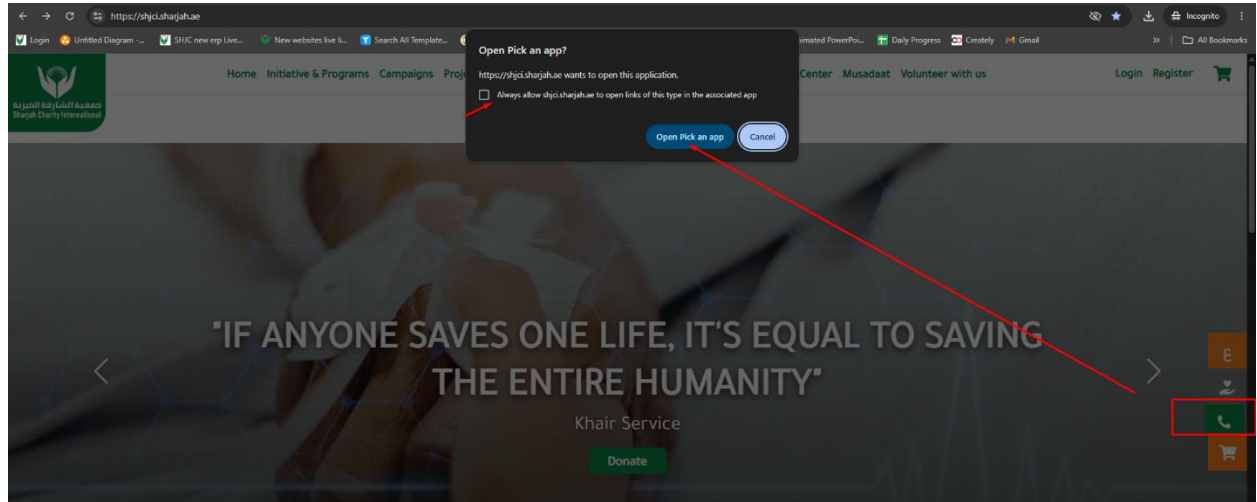

- Show phone icon only for mobile screen sizes.
- Hide phone icon for desktop and laptop screens.
- Example condition: show only when screen width is less than mobile/tablet breakpoint.
- Desktop view should show other relevant contact options only, such as WhatsApp, cart, or donation icons.

Severity

Low to Medium – It does not block donation flow, but it creates bad user experience on desktop.

Priority

Medium

8. Bug Title

Login button is not clickable and does not redirect to login page on Ambassador Detail page

URL

<https://shjc.sharjah.ae/ambassadordetailpage>

Screen/Page

Ambassador of Goodness / Ambassador Detail Page

Description

On the **Ambassador of Goodness** detail page, the **Login** button is visible below the initiative description. However, when the user clicks the Login button, it does not work and does not redirect the user to the login page.

The button should allow users/influencers to log in and access the ambassador-related functionality, but currently no action is performed.

Steps to Reproduce

1. Open the Ambassador Detail page using this URL:
<https://shjc.sharjah.ae/ambassadordetailpage>
2. Scroll to the section where the initiative description is displayed.
3. Locate the **Login** button below the description.
4. Click on the **Login** button.
5. Observe whether the page redirects to the login page.

Actual Result

- Login button is visible on the page.
- User clicks the Login button.
- Button does not respond or redirect.

- No login page opens.
- No error or validation message is displayed.
- User cannot proceed with login from this page.

Expected Result

- Login button should be clickable.
- On clicking the Login button, user should be redirected to the login page.
- If login is required for ambassador/influencer access, system should open the correct login screen.
- If there is any issue, a proper message should be displayed to the user.

Severity

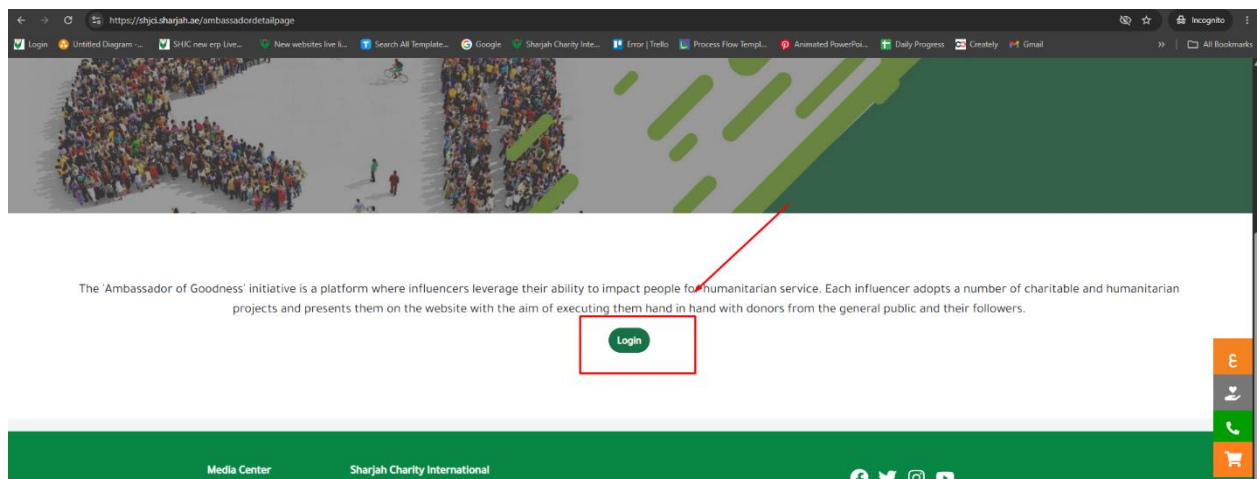

High – User cannot access login from the Ambassador Detail page.

Priority

High

Module

Ambassador of Goodness / Login / Navigation

9. Bug Title

Incorrect spelling displayed in website navigation menu: “Musadaat”

URL

<https://shjc.sharjah.ae/volunteer>

Screen/Page

Volunteer Page / Header Navigation Menu

Description

On the website header navigation menu, the menu item “**Musadaat**” is displayed with incorrect spelling. This appears in the top navigation bar between **Media Center** and **Volunteer with us**.

The spelling should be corrected as per the approved website terminology/branding. Incorrect spelling in the main navigation affects the website’s professional appearance and may confuse users.

Steps to Reproduce

1. Open the website page:
<https://shjc.sharjah.ae/volunteer>
2. Check the top header navigation menu.
3. Locate the menu item displayed after **Media Center**.
4. Observe the spelling of **Musadaat**.

Actual Result

- The navigation menu shows incorrect spelling:
Musadaat

Expected Result

- The navigation menu spelling should be corrected according to the approved name.
- The corrected spelling should be displayed consistently across all website pages.
- No spelling mistake should appear in the main navigation menu.

Severity

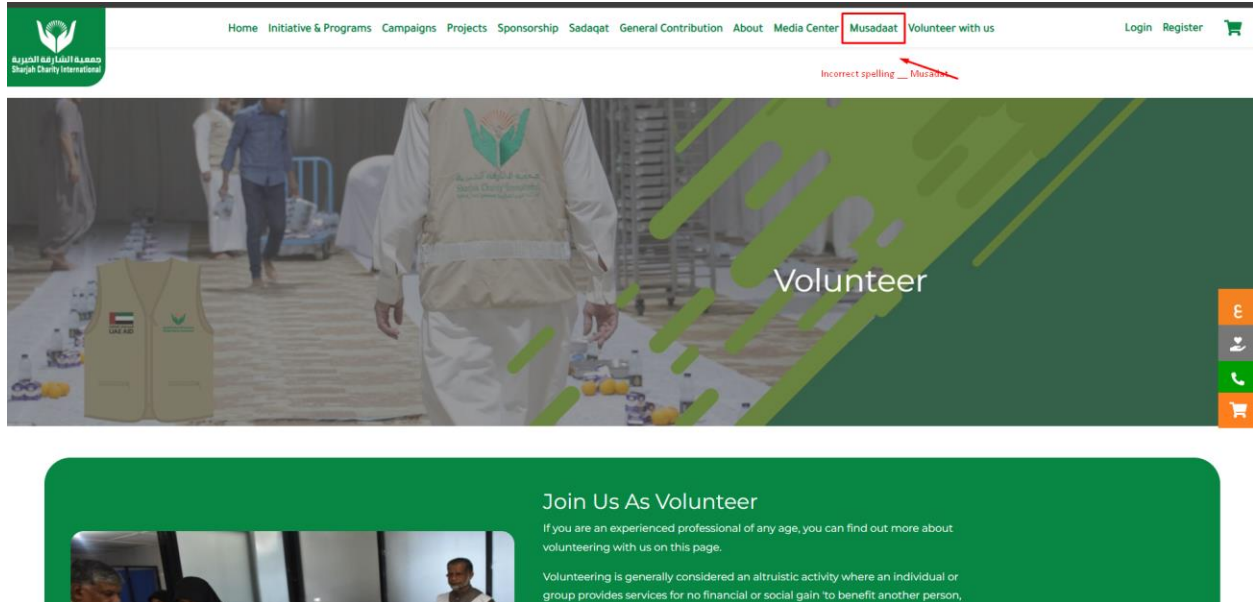

Low – Text/spelling issue does not block functionality, but affects website quality and professionalism.

Priority

Medium

Module

Website Header / Navigation Menu

10. Bug Title

Mobile page content is not responsive and text is displayed in a very narrow column

URL

<https://shjc.sharjah.ae>

Screen/Page

Mobile View / Website Content Page

Description

On mobile view, the page content is not displaying correctly. The text appears squeezed into a very narrow vertical column, causing each word or few letters to appear on separate lines. This makes the content difficult to read and affects the user experience.

The issue seems related to responsive design or layout width handling on mobile devices. The page should automatically adjust according to the mobile screen size and display the content in a readable format.

Steps to Reproduce

1. Open the website on a mobile device.
2. Navigate to the affected page.
3. Scroll through the content area.
4. Observe that the text is displayed in a very narrow column instead of using the full available screen width.

Actual Result

The content text is squeezed into a narrow vertical column, making it difficult to read.

Expected Result

The content should be properly responsive on mobile devices. Text should use the available screen width and display in a readable paragraph format without unnecessary vertical wrapping.

Severity

Medium – The issue does not block website access, but it significantly affects readability and user experience on mobile devices.

Priority

High
