Prepared For	Money Box Module – New Design
Modules Covered	Account
Testing Period	06 June2026
System / Environment	ERP Application
Report Type	Quality Assurance Testing & Bug Report
Reviewed By	Development Team

Document Version: 1.0

Confidentiality: Internal Use Only

Date: June 2026

1. Bug Title

Old request/record becomes hidden after editing and saving in Money Boxes screen

URL

<https://10.10.10.154:200/moneybox/moneyBoxes>

Screen/Page

Money Boxes / الحسابات

Description

When the user edits an existing/old request from the table and then clicks save, the updated request/record becomes hidden or does not display properly in the table. The record should remain visible after saving, but instead it appears to disappear or hide from the list.

Steps to Reproduce

1. Open the Money Boxes screen using this URL:
<https://10.10.10.154:200/moneybox/moneyBoxes>
2. Search or select an existing/old request from the table.
3. Click on the **تعديل** button for any existing record.
4. Update any required field.
5. Click the save/update button.
6. Return to the table/list view.
7. Observe that the edited record is hidden or not displayed correctly in the table.

Actual Result

- After editing and saving the old request, the record becomes hidden or does not appear properly in the table.
- User cannot clearly confirm whether the update was saved successfully.
- Table/list view does not refresh or display the updated record correctly.

Expected Result

- After editing and saving, the updated record should remain visible in the table.
- The table should refresh properly and show the latest updated data.
- User should receive a success message after saving.
- No record should disappear or become hidden after update.

Severity

High – Existing records cannot be verified properly after edit/save, which affects daily operational work.

Priority

High

Module

الحصالات / Money Box

Screenshot of the Money Box / الحصالات module interface. The interface shows a table with columns for various fields, including a dropdown menu for 'الرقم' (Number) and a 'تصدير' (Export) button. The table contains data rows with values like 'مفقودة' (Lost) and 'نصف برج 10' (Half Tower 10). A red arrow points to the 'الرقم' column header. A sidebar on the right contains navigation links for 'الرئيسية' (Home), 'إضافة حصة' (Add Share), 'التقارير' (Reports), 'نوع الحصالات الفرعي' (Sub-type of Shares), 'لائحة اللجنة الميدانية' (Field Committee List), 'أعضاء لجنة الحصالات' (Members of the Shares Committee), 'لوحة تحكم اللجان' (Committee Dashboard), and 'التحصيلات' (Collections).

الرقم	الرقم الرئيسي	الرقم الفرعي	الرقم الفرعي	الرقم الفرعي	الرقم الفرعي	الرقم الفرعي	الرقم الفرعي	الرقم الفرعي	الرقم الفرعي
مفقودة	نصف برج 10	86	ك						
مفقودة	نصف برج 10	21	ك						
مفقودة	م 3 ق 3	46	ك						
مفقودة	برقالي	74	ك						
مفقودة	نصف برج 10	8	ك						

2. Bug Title

Error occurs when adding new Money Box and clicking Save

URL

<https://10.10.10.154:200/moneybox/moneyBoxes>

Screen/Page

Money Boxes / الحسابات

Description

When the user tries to add a new Money Box from the **Money Boxes / الحسابات** screen and clicks the **حفظ** button, the system shows an error message and the new Money Box is not saved.

The error message displayed is:

"حدث خطأ. يرجى التواصل مع الدعم الفني إذا استمر هذا الخطأ"

Translation: "An error occurred. Please contact technical support if this error continues."

Steps to Reproduce

1. Open the Money Boxes screen using the URL:
<https://10.10.10.154:200/moneybox/moneyBoxes>
2. Click on the **إضافة / Add** button.
3. The **إضافة حساب جديدة** form will open.
4. Fill in the required fields, such as:
 - نوع / Type
 - كود رئيسي / Main Code
 - كود / Code
 - الرقم / Number
 - تصنيف الحساب / Money Box Classification
5. Click on the **حفظ** button.
6. Observe the error message displayed on the screen.

Actual Result

- The system displays an error message after clicking **حفظ**.
- New Money Box is not saved.
- User cannot complete the add process successfully.
- Error message appears
"حدث خطأ. يرجى التواصل مع الدعم الفني إذا استمر هذا الخطأ"

Expected Result

- New Money Box should be saved successfully.
- System should show a success message after saving.
- The newly added Money Box should appear in the Money Boxes table/list.
- No error message should appear.

Severity

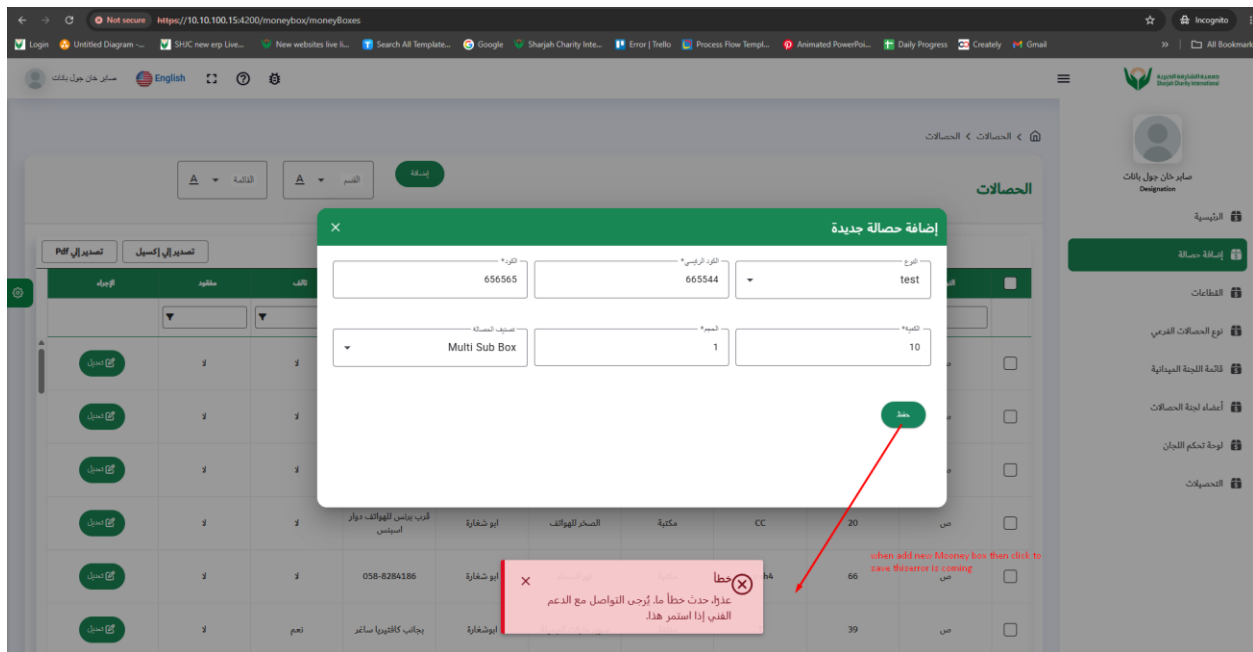

High – User is unable to add a new Money Box, which affects core Money Box management functionality.

Priority

Module

الحصاالت / Money Box

3. Bug Title

Error occurs when adding new Section Grouping and clicking Save

URL

<https://10.10.10.154:200/moneybox/sections/sectionsGrouping/a64e09d7-5f17-eb11-81d7-000c29d5b0c7>

Screen/Page

Money Boxes → Sections Grouping / مجموعة الحسابات

Description

When the user tries to add a new Section Grouping from the Money Boxes section and clicks the **حفظ** button, the system shows an error message and the new section grouping is not saved.

The error message displayed is:

"حدث خطأ. يرجى التواصل مع الدعم الفني إذا استمر هذا الخطأ"

Translation: "An error occurred. Please contact technical support if this error continues."

Steps to Reproduce

1. Open the Section Grouping screen using the URL:
<https://10.10.10.154:200/moneybox/sections/sectionsGrouping/a64e09d7-5f17-eb11-81d7-000c29d5b0c7>
2. Click on the **إضافة** / **Add** button.
3. The **إضافة مجموعة** form will open.
4. Fill in the required fields, such as:
 - التصنيف / Classification
 - رقم المجموعة / Group Number
5. Click on the **حفظ** button.
6. Observe the error message displayed on the screen.

Actual Result

- The system displays an error message after clicking **حفظ**.
- New Section Grouping is not saved.
- User cannot complete the add process successfully.
- Error message appears:
"حدث خطأ. يرجى التواصل مع الدعم الفني إذا استمر هذا الخطأ"

Expected Result

- New Section Grouping should be saved successfully.
- System should show a success message after saving.
- The newly added Section Grouping should appear in the list/table.
- No error message should appear.

Severity

High – User is unable to add a new Section Grouping, which affects Money Box section management functionality.

Priority

4. Bug Title

Add button is missing in Assign Money Box subsection screen

URL

<https://10.10.10.154:200/moneybox/sections/assignMoneybox/3ff57db3-3d62-f111-8272-000c29b5ee4d>

Screen/Page

Money Boxes → Sections → Assign Money Box / تعيين حصاله

Description

On the **Assign Money Box** subsection screen, the **Add / إضافة** button is missing. Because of this, the user cannot add or assign a new Money Box from this screen.

The screen shows the Money Box list and Assign Money Box section, but there is no button available to add a new record.

Steps to Reproduce

1. Open the Assign Money Box screen using the URL:
<https://10.10.10.154:200/moneybox/sections/assignMoneybox/3ff57db3-3d62-f111-8272-000c29b5ee4d>
2. Check the top section of the page.
3. Check the Money Boxes table/list area.
4. Check the Assign Money Box section.
5. Observe that there is no **Add / إضافة** button available.

Actual Result

- **Add / إضافة** button is missing from the subsection screen.
- User cannot add or assign a new Money Box.
- User is unable to perform the required assignment action from this page.

Expected Result

- **Add / إضافة** button should be available on the Assign Money Box subsection screen.
- User should be able to click the Add button and assign a new Money Box.
- The newly assigned Money Box should appear in the table/list after saving.

Severity

Medium / High – User cannot add or assign a Money Box from this subsection, which blocks the assignment functionality.

Priority

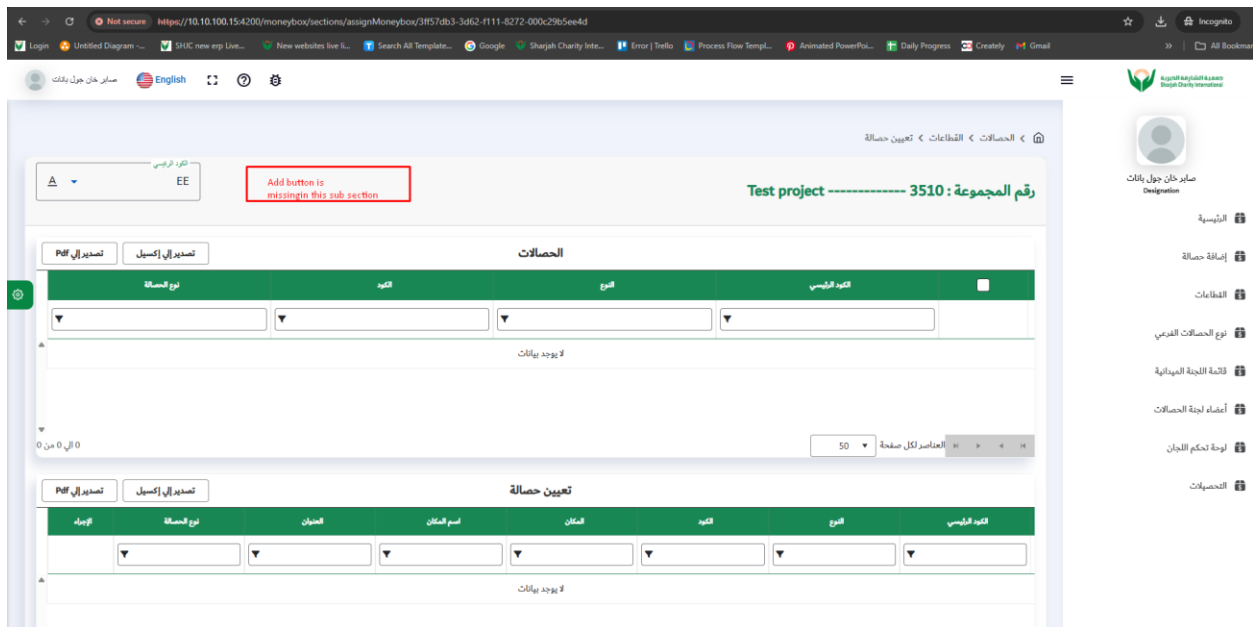

High

Module

الحصانات / Money Box

Sub Module

تعيين حصالة / Assign Money Box

5. Bug Title

Group title/alignment is not displayed properly on Assign Money Box screen

URL

<https://10.10.10.154:200/moneybox/sections/assignMoneybox/3ff57db3-3d62-f111-8272-000c29b5ee4d>

Screen/Page

Money Boxes → Sections → Assign Money Box / تعيين حصالة

Description

On the **Assign Money Box / تعيين حصالة** screen, the group title is not displayed properly. The text:

Test project ----- رقم المجموعة : 3510

appears with incorrect alignment/formatting. The Arabic and English text are mixed in the same line and the direction/alignment looks broken. This affects readability and makes the page look inconsistent.

Steps to Reproduce

1. Open the Assign Money Box screen using this URL:
`https://10.10.10.154:200/moneybox/sections/assignMoneybox/3ff57db3-3d62-f111-8272-000c29b5ee4d`
2. Check the group title displayed at the top-right side of the page.
3. Observe the text formatting and alignment.

Actual Result

- Group title is not aligned properly.
- Arabic and English text appear mixed incorrectly.
- The displayed title looks like:
3510 : رقم المجموعة ----- Test project
- Text direction/spacing is not properly handled.

Expected Result

- Group title should be displayed clearly and properly aligned.
- Arabic and English text should follow correct RTL/LTR formatting.
- The title should appear in a clean and readable format, for example:
3510 - رقم المجموعة : Test project
- No broken spacing or unnecessary dashes should appear.

Severity

Low / Medium – This is a UI/display issue, but it affects readability and page presentation.

Priority

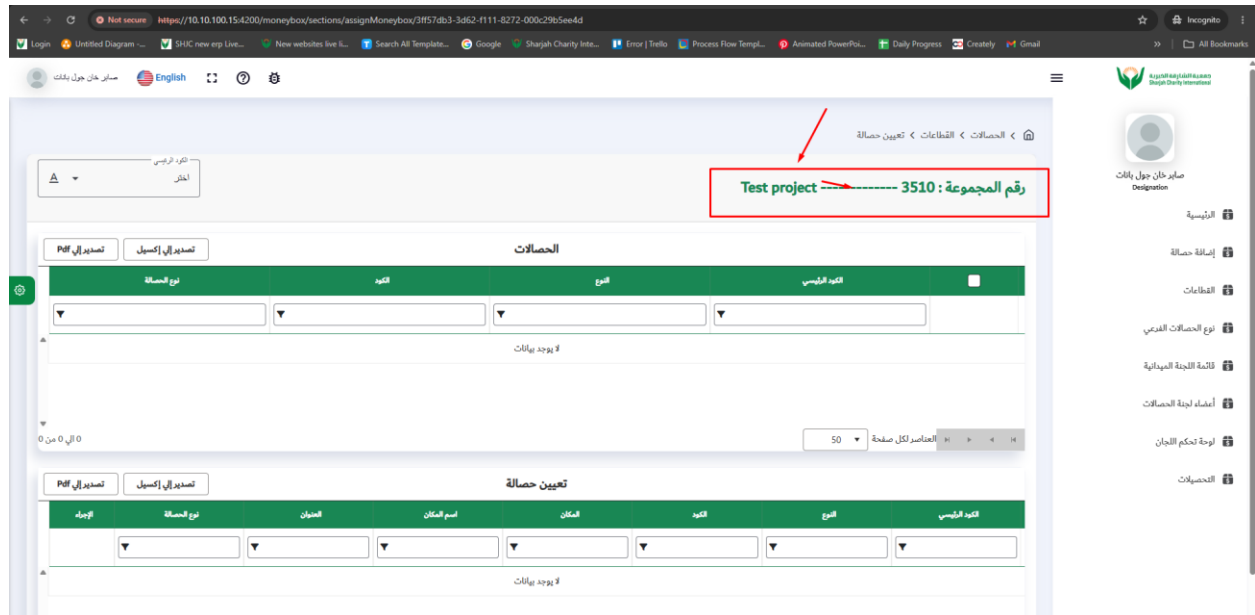

Medium

Module

Money Box / الحسابات

Sub Module

Assign Money Box / تعيين حصة

6. Bug Title

Deleted record shows success message but data is not removed from Sub Money Box Type list

URL

<https://10.10.10.154:200/moneybox/moneyboxSubTypes>

Screen/Page

Money Boxes → Sub Money Box Type / نوع الحسابات الفرعي

Description

When the user deletes a record from the **Sub Money Box Type / نوع الحسابات الفرعي** screen, the system displays a success message saying that the record has been deleted successfully. However, the deleted record still remains visible in the table/list and is not removed from the screen.

The success message displayed is:

"تم الحذف بنجاح"

Translation: "Deleted successfully"

Steps to Reproduce

1. Open the Sub Money Box Type screen using the URL:
<https://10.10.10.154:200/moneybox/moneyboxSubTypes>
2. Select any existing record from the list.
3. Click on the **حذف / Delete** button.
4. Confirm the delete action, if confirmation popup appears.
5. Observe the success message.
6. Check the table/list after deletion.

Actual Result

- System shows success message:
"تم الحذف بنجاح"
- The selected record is still visible in the list.
- Data is not removed from the table after delete.
- User cannot confirm whether the record was actually deleted from the database or only the UI failed to refresh.

Expected Result

- After clicking **Delete**, the selected record should be removed successfully.
- The deleted record should disappear from the table/list.
- Table should refresh automatically after successful deletion.
- Success message should appear only when the record is actually deleted.

Severity

Medium / High – Delete functionality is not working properly or the table is not refreshing correctly, which may cause incorrect data management.

Priority

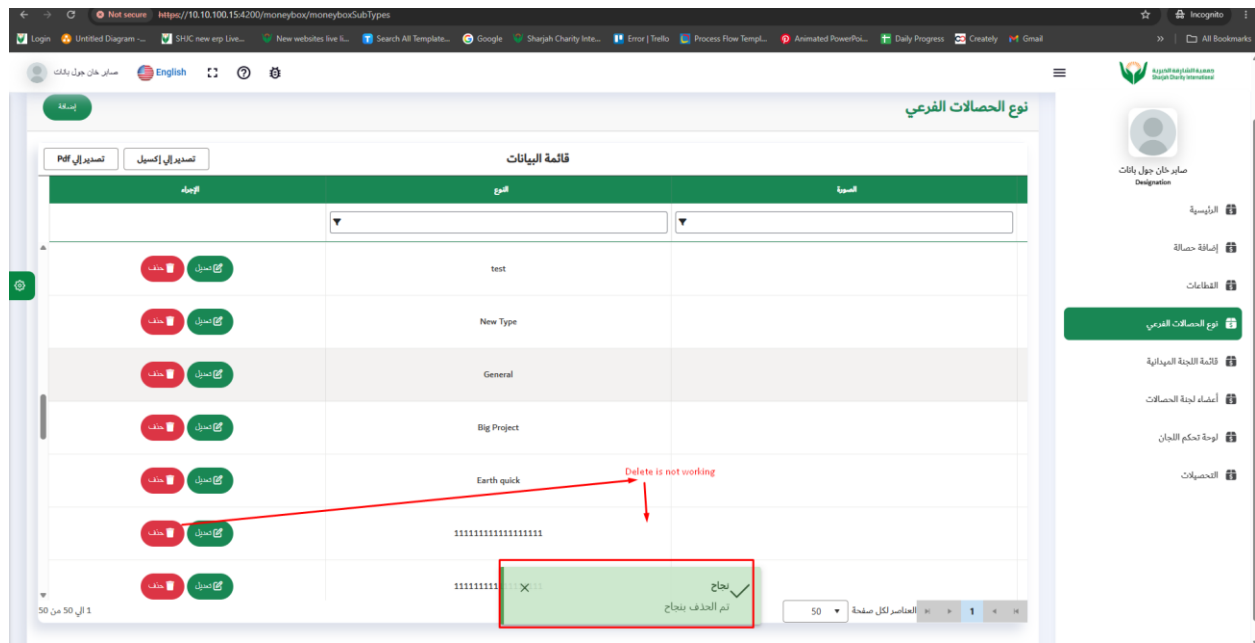

High

Module

Money Box / الحسابات

Sub Module

7. Bug Title

New Sub Money Box Type shows success message but data is not added in the list

URL

<https://10.10.10.154:200/moneybox/moneyboxSubTypes>

Screen/Page

Money Boxes → Sub Money Box Type / نوع الحاصلات الفرعي

Description

When the user adds a new record in the **Sub Money Box Type / نوع الحاصلات الفرعي** screen and clicks **Save**, the system displays a success message. However, the newly added data does not appear in the list/table after saving.

The success message appears, but the record is not visible, so the user cannot confirm whether the data was actually saved in the database or if the table failed to refresh.

Steps to Reproduce

1. Open the Sub Money Box Type screen using the URL:
<https://10.10.10.154:200/moneybox/moneyboxSubTypes>
2. Click on the **إضافة / Add** button.

3. Enter the required details for the new Sub Money Box Type.
4. Click on the **حفظ** / **Save** button.
5. Observe the success message.
6. Check the list/table after saving.

Actual Result

- System shows a success message after saving.
- Newly added data does not appear in the list/table.
- User cannot confirm whether the data was saved successfully.
- The table does not refresh or display the newly added record.

Expected Result

- After clicking **Save**, the new record should be saved successfully.
- The newly added Sub Money Box Type should appear in the list/table immediately.
- Table should refresh automatically after saving.
- Success message should appear only when the record is actually saved and visible in the list.

Severity

High – Add functionality is not working properly or the newly saved data is not displayed, which affects data management.

Error occurs when changing Active/Inactive status in Field Committee List screen

URL

<https://10.10.10.154:200/moneybox/outFieldCommitteeList>

Screen/Page

Money Boxes → Field Committee List / قائمة اللجنة الميدانية

Description

When the user tries to change the status using the **Active/Inactive toggle** in the **Field Committee List** / قائمة اللجنة الميدانية screen, the system displays an error message and the status is not updated successfully.

The error message displayed is:

"حدث خطأ. يرجى التواصل مع الدعم الفني إذا استمر هذا الخطأ"

Translation: "An error occurred. Please contact technical support if this error continues."

Steps to Reproduce

1. Open the Field Committee List screen using the URL:
<https://10.10.10.154:200/moneybox/outFieldCommitteeList>

2. Go to the records list/table.
3. Select any record.
4. Click on the **Active/Inactive toggle** under the **فعال / Active** column.
5. Observe the error message displayed on the screen.

Actual Result

- System displays an error message after clicking the status toggle.
- Active/Inactive status is not updated.
- User cannot enable or disable the selected record.
- Error message appears:
"حدث خطأ. يرجى التواصل مع الدعم الفني إذا استمر هذا الخطأ"

Expected Result

- User should be able to change the status successfully.
- Toggle should update from Active to Inactive or Inactive to Active without error.
- System should show a success message after status update.
- Updated status should remain saved after refreshing the page.

Severity

High – User cannot update the active status of committee records, which affects field committee management.

New Field Committee record shows success message but data is not displayed in the table

URL

<https://10.10.10.154:200/moneybox/outFieldCommitteeList>

Screen/Page

Money Boxes → Field Committee List / قائمة اللجنة الميدانية

Description

When the user adds a new record in the **Field Committee List / قائمة اللجنة الميدانية** screen and clicks **Save**, the system displays a success message. However, the newly added data does not appear in the table/list after saving.

The success message appears, but the record is not visible in the list, so the user cannot confirm whether the data was actually saved in the database or if the table failed to refresh.

Success message displayed:

"نجاح - تم الحفظ بنجاح"

Translation: "Success - Saved successfully"

Steps to Reproduce

1. Open the Field Committee List screen using the URL:
`https://10.10.10.154:200/moneybox/outFieldCommitteeList`
2. Click on the **إضافة / Add** button.
3. Enter the required details for the new Field Committee record.
4. Click on the **حفظ / Save** button.
5. Observe the success message displayed on the screen.
6. Check the table/list after saving.

Actual Result

- System shows success message:
"نجاح - تم الحفظ بنجاح"
- Newly added record does not appear in the table/list.
- User cannot confirm whether the data was saved successfully.
- Table does not refresh or display the newly added data.

Expected Result

- After clicking **Save**, the new Field Committee record should be saved successfully.
- The newly added record should appear in the table/list immediately.
- Table should refresh automatically after saving.
- Success message should appear only when the saved data is visible or correctly added.

Severity

High – Add functionality is not working properly or the saved data is not displayed, which affects Field Committee management.

10.Bug Title

Employee Name and Committee Name fields are missing in new Committee Members screen

URL

<https://10.10.10.154:200/moneybox/outFieldCommitteeMembers>

Screen/Page

Money Boxes → Field Committee Members / أعضاء لجنة الحاصلات

Description

In the old screen/design, the user had fields for selecting or entering:

- اسم الموظف / Employee Name
- اللجنة المؤقتة / Committee Name

But in the new screen, these fields are not available. Because of this, the user cannot search, filter, or add committee members properly using employee name and committee name.

The required fields are missing from the new UI compared to the old screen.

Steps to Reproduce

1. Open the Field Committee Members screen using the URL:
`https://10.10.10.154:200/moneybox/outFieldCommitteeMembers`
2. Check the search/add section at the top of the page.
3. Compare it with the old screen/design.
4. Observe that the following fields are missing in the new screen:
 - **Employee Name** / اسم الموظف
 - **Committee Name** / اللجنة المؤقتة

Actual Result

- **Employee Name** field is not available in the new screen.
- **Committee Name** field is not available in the new screen.
- User cannot select/search employee name properly.
- User cannot select/search committee name properly.
- New screen does not match the old screen functionality.

Expected Result

- New screen should include the same required fields as the old screen.
- **Employee Name** / اسم الموظف field should be available.
- **Committee Name** / اللجنة المؤقتة field should be available.
- User should be able to search/filter or add committee members using these fields.
- Functionality should remain the same as the old screen.

Severity

High – Required fields are missing, which blocks proper committee member search/add functionality.

PDF report shows processing error when opening Money Box Key Report receipt

URL

<https://10.10.10.154:200/moneybox/fieldCommittee/addCommittee/86fc4df7-9249-eb11-8336-00056d818d71>

Screen/Page

Money Boxes → Field Committee / Add Committee → Receipt / الإيصال

Description

When the user opens or generates the **MoneyBoxKeyReport** PDF report from the Field Committee/Add Committee screen, the PDF viewer opens but the report is not generated correctly. Instead of showing the proper receipt/report data, the PDF displays a report processing error.

The error shown inside the PDF is related to processing the report table and dataset execution.

Steps to Reproduce

1. Open the Field Committee/Add Committee screen using the URL:
<https://10.10.10.154:200/moneybox/fieldCommittee/addCommittee/86fc4df7-9249-eb11-8336-00056d818d71>
2. Click on the report/receipt option.
3. PDF viewer opens with report name:
MoneyBoxKeyReport
4. Observe the generated PDF content.

Actual Result

- PDF viewer opens successfully.
- Report content is not generated correctly.
- PDF shows a report processing error instead of receipt/report details.
- User cannot print or verify the Money Box Key Report.

Error visible in the PDF:

“An error has occurred while processing Table ‘table1’.”

Expected Result

- MoneyBoxKeyReport should generate successfully.
- PDF should display the correct receipt/report details.
- User should be able to view, download, and print the report without any error.
- No report processing or dataset error should appear.

Severity

High – Report generation is failing, and the user cannot print or view the required receipt/report.

Committee Report PDF displays processing error instead of complete report data

URL

<https://10.10.10.154:200/91b1957d-b0b2-49a6-a356-6192984f4bed>

Screen/Page

Money Boxes → Field Committee Report / لجنة تحصيل رسوم فتح الحسابات

Description

When the user opens/generates the committee PDF report, the PDF viewer opens and the report layout is partially displayed. However, the report shows a processing error inside the PDF content instead of generating the complete report data.

The report displays the Sharjah Charity International logo and some form fields, but the main report data is not generated correctly due to a report processing/table error.

The error visible in the PDF is:

“An error has occurred while processing Table ‘table1’.”

Steps to Reproduce

1. Open the Money Box module.
2. Navigate to the Field Committee / Committee Report section.
3. Generate or open the committee report PDF.
4. PDF viewer opens in the browser.
5. Observe the report content on page 1.

Actual Result

- PDF viewer opens successfully.
- Report layout appears partially.
- A red error message appears inside the PDF.
- Report data is not loaded completely.
- User cannot use the report for printing or official processing.

Error shown:

“An error has occurred while processing Table ‘table1’.”

Expected Result

- Committee report PDF should generate successfully.
- All report data should display correctly.
- No processing/table error should appear inside the PDF.
- User should be able to view, download, and print the report properly.

Severity

High – Report generation is failing, which affects official committee report printing and processing.

Service Name dropdown shows empty list in External Collections screen

URL

<https://10.10.10.154:200/moneybox/outSideCollections/outSideCollection/b1533dec-5a62-f111-8272-000c29b5ee4d>

Screen/Page

Money Boxes → External Collections / التحصيلات الخارجية

Description

When the user opens the **External Collections / التحصيلات الخارجية** screen and clicks on the **اسم الخدمة / Service Name** dropdown, the dropdown list opens but no service records are displayed. The list appears empty, so the user cannot select any service name.

Because of this issue, the user may not be able to filter/search the external collection records properly or complete the required process where service selection is needed.

Steps to Reproduce

1. Open the External Collections screen using the URL:
`https://10.10.10.154:200/moneybox/outSideCollections/outSideCollection/b1533dec-5a62-f111-8272-000c29b5ee4d`
2. Go to the top-right section of the page.
3. Click on the **اسم الخدمة / Service Name** dropdown.
4. Observe the dropdown list.

Actual Result

- Service Name dropdown opens.
- Dropdown list is empty.
- No service names are displayed for selection.
- User cannot select the required service.

Expected Result

- Service Name dropdown should display the available service names.
- User should be able to select a service from the list.
- Dropdown data should load properly without empty records.
- Search/filter should work according to the selected service.

Severity

Medium / High – User cannot select service name, which affects filtering/searching and external collection processing.

List/Data Not Displayed in New Design While Same Data Appears Correctly in Old Design – Money Boxes Screen (Money box Test 1011)

URL

<https://10.10.10.154:200/moneybox/moneyBoxes>

Screen/Page

Money Boxes / الحاصلات

Description

In the Money Boxes screen, the records/list are displayed correctly in the old design, but the same records are not displayed in the new design. Although data exists in the system and is visible in the old screen, the new screen fails to load or show the list properly. This creates inconsistency between the old and new versions and prevents users from viewing available records.

Steps to Reproduce

1. Open the Money Boxes screen in the **Old Design**.
2. Verify that records/data are displayed correctly in the list.
3. Open the same screen in the **New Design**.
4. Use the same search criteria or default view.
5. Compare the results between both screens.
6. Observe that records visible in the old design are not displayed in the new design.

Actual Result

- Records are displayed correctly in the old design.

- The same records are missing or not visible in the new design.
- Users cannot access or view the expected data from the new screen.
- Data consistency between old and new designs is not maintained.

Expected Result

- The new design should display the same records as the old design.
- Data count and list results should be consistent across both versions.
- Users should be able to view all available records without any missing data.
- Search and filtering functionality should return identical results in both designs.

Severity

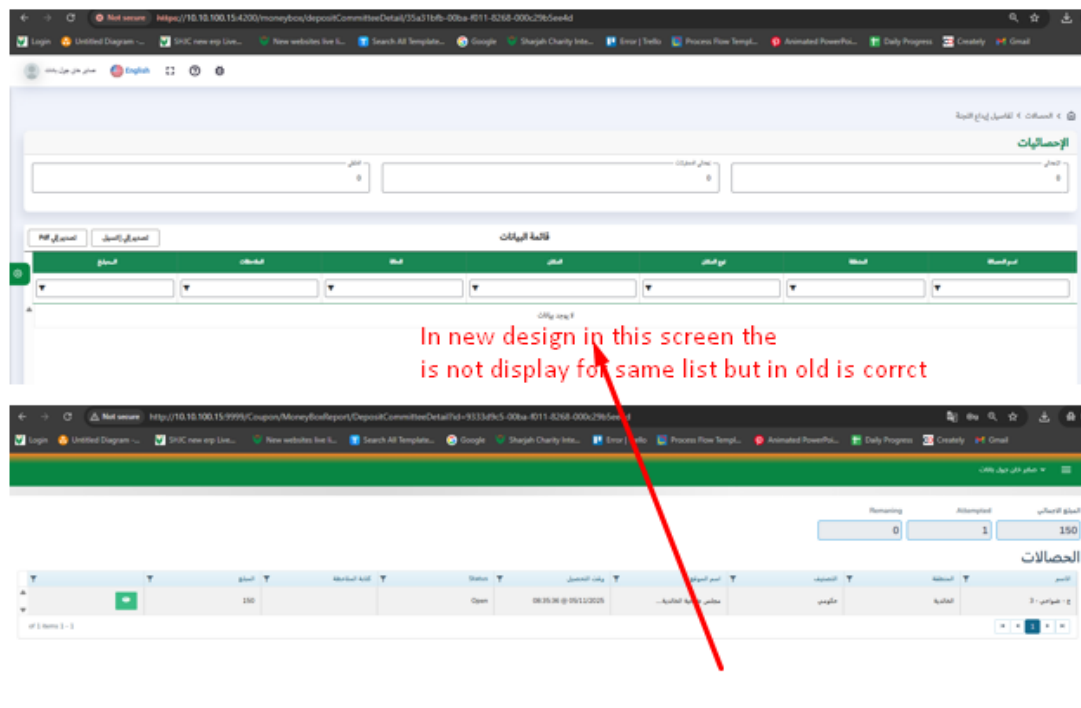

High – Users cannot view existing records in the new design, causing operational and verification issues.

Missing Columns in New Design Compared to Old Design – Money Boxes List Screen

URL

<https://10.10.10.154:200/moneybox/moneyBoxes>

Screen/Page

Money Boxes / الحسابات

Description

The list/grid displayed in the New Design is missing two columns that are available and visible in the Old Design. As a result, users cannot view complete record information in the new screen. The table structure is inconsistent between both versions, causing functionality and reporting discrepancies.

Steps to Reproduce

1. Open the Money Boxes screen in the **Old Design**.
2. Navigate to the records list/grid section.
3. Note all available columns displayed in the table.
4. Open the same Money Boxes screen in the **New Design**.
5. Navigate to the records list/grid section.
6. Compare the table columns between the old and new screens.
7. Observe that two columns available in the old design are missing in the new design.

Actual Result

- Two columns visible in the old design are not displayed in the new design.
- Users cannot access complete information from the records list.
- The table structure differs between old and new versions.
- Data visibility is reduced in the new design.

Expected Result

- All columns available in the old design should also be displayed in the new design.
- The table structure should remain consistent across both versions.
- Users should have access to the same information regardless of the design version.
- No column should be removed unless approved as part of a documented business requirement.

Severity

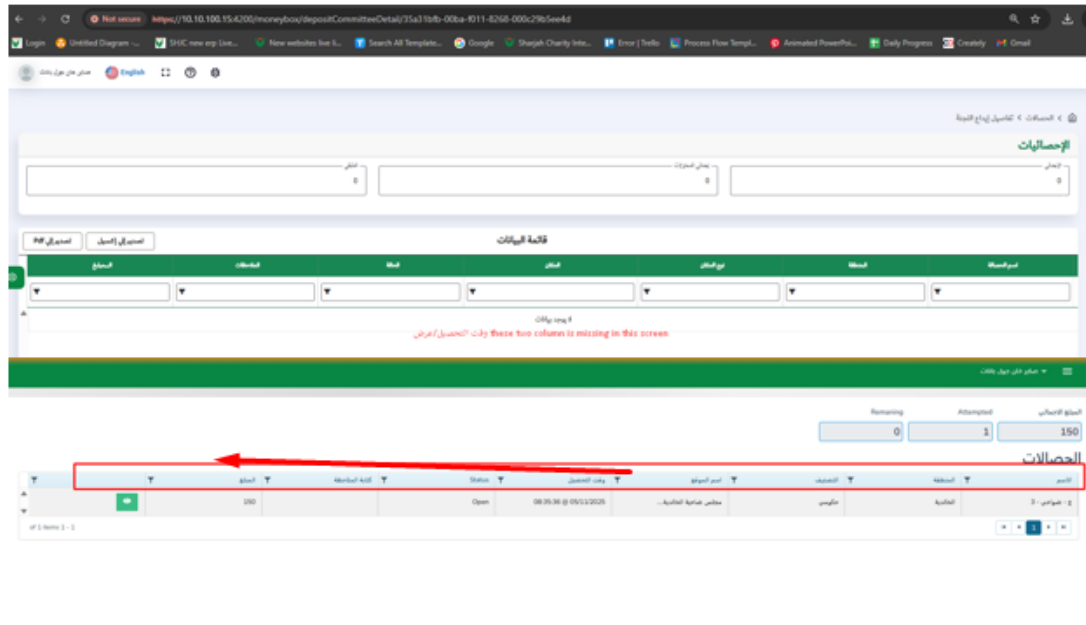

Medium-High – Missing columns limit data visibility and may impact operational processes and reporting accuracy.

Report Columns Mismatch in New Design Compared to Old Design – Collection/Lost Report

URL

```
https://10.10.10.154:200/moneybox/reports
```

Screen/Page

Collection / Lost Report

Description

The report generated in the New Design contains fewer columns than the report generated in the Old Design. Several important columns that were available in the old report are either missing or renamed in the new version. This results in incomplete reporting data and prevents users from accessing the full information required for operational and audit purposes.

Steps to Reproduce

1. Open the Collection/Lost Report screen in the **Old Design**.
2. Generate the report using any valid search criteria.
3. Note the number and names of columns displayed in the report.
4. Open the same report in the **New Design**.
5. Generate the report using the same criteria.
6. Compare both reports.
7. Observe that multiple columns available in the old report are missing or renamed in the new report.

Actual Result

- The New Design report displays only a limited number of columns.
- Several fields available in the Old Design report are missing.

- Report structure is inconsistent between old and new versions.
- Users receive incomplete reporting information.

Expected Result

- The New Design report should contain all columns available in the Old Design report.
- Column names and sequence should remain consistent unless officially approved.
- Users should receive the same report output in both versions.
- No business-critical field should be removed from the report.

Severity

High – Missing report columns affect reporting accuracy, data verification, and operational decision-making.

Priority

High

Module

Status Change Popup Size/Alignment Issue – Damage Money Boxes Screen

URL

<https://10.10.10.154:200/moneybox/damageMoneyBoxes>

Screen/Page

الحصالات التالفة / Damage Money Boxes

Description

When the user clicks the **Change Status** (تغيير الحالة) action, a popup/modal window is displayed. However, the popup content area is not properly sized and contains excessive empty space. The modal layout appears broken or improperly aligned, resulting in a poor user experience and inefficient use of screen space.

Steps to Reproduce

1. Open the Damage Money Boxes screen using the URL:
<https://10.10.10.154:200/moneybox/damageMoneyBoxes>
2. Select any record from the list.
3. Click the **Change Status** (تغيير الحالة) button/action.
4. Observe the popup/modal that appears.
5. Review the content area inside the popup.

Actual Result

- The popup contains a large empty content area.
- Modal size is not adjusted according to the available fields.
- Excessive white space is displayed below the status controls.
- Popup layout appears misaligned and unoptimized.

Expected Result

- The popup should automatically resize according to its content.
- Empty space should be removed.
- Fields and controls should be properly aligned within the modal.
- The dialog should have a clean and professional appearance consistent with the application design standards.

Severity

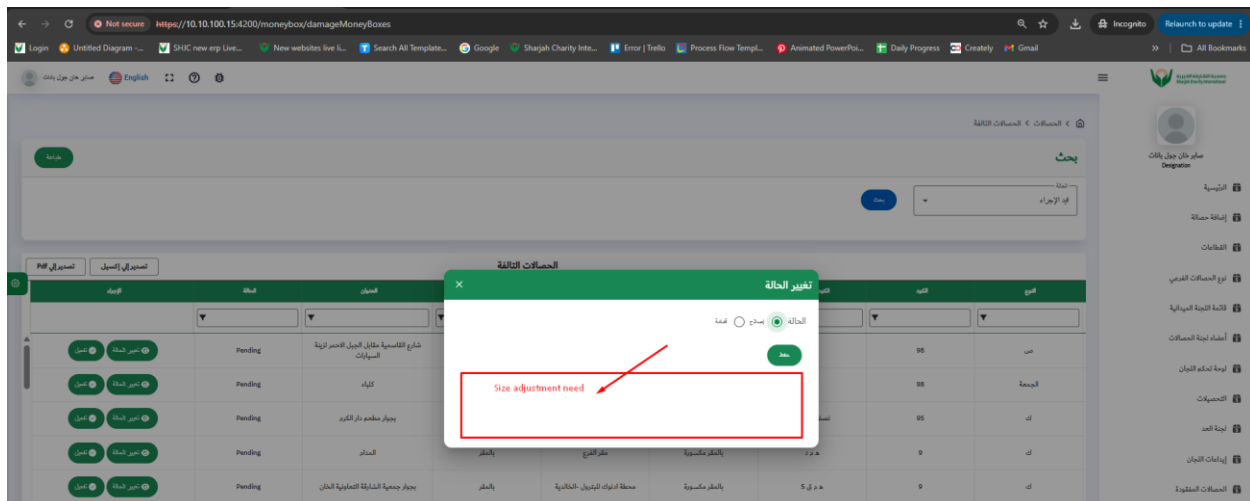

Medium – Does not block functionality but negatively affects usability and user experience.

Priority

Medium

Dropdown Values Displayed in English Instead of Arabic – Damage Money Boxes Screen

URL

<https://10.10.10.154:200/moneybox/damageMoneyBoxes>

Screen/Page

Damage Money Boxes / الحصالات التالفة

Description

In the Damage Money Boxes screen, the status dropdown contains values displayed in English (e.g., "Repair" and "garbage"), while the application interface is configured in Arabic. Dropdown values should be translated and displayed in Arabic to maintain language consistency throughout the system.

Steps to Reproduce

1. Open the Damage Money Boxes screen using the URL:
<https://10.10.10.154:200/moneybox/damageMoneyBoxes>
2. Navigate to the search/filter section.
3. Click on the **Status (الحالة)** dropdown.
4. Review the available dropdown values.
5. Observe that some values are displayed in English.

Actual Result

- Dropdown contains English values such as:
 - Repair
 - garbage
- Language is inconsistent with the Arabic user interface.
- Users may experience confusion due to mixed-language content.

Expected Result

- All dropdown values should be displayed in Arabic.
- Suggested translations:
 - Repair → إصلاح
 - Garbage → إتلاف or نفايات (according to business requirements)
- The entire screen should maintain a consistent Arabic language interface.

Severity

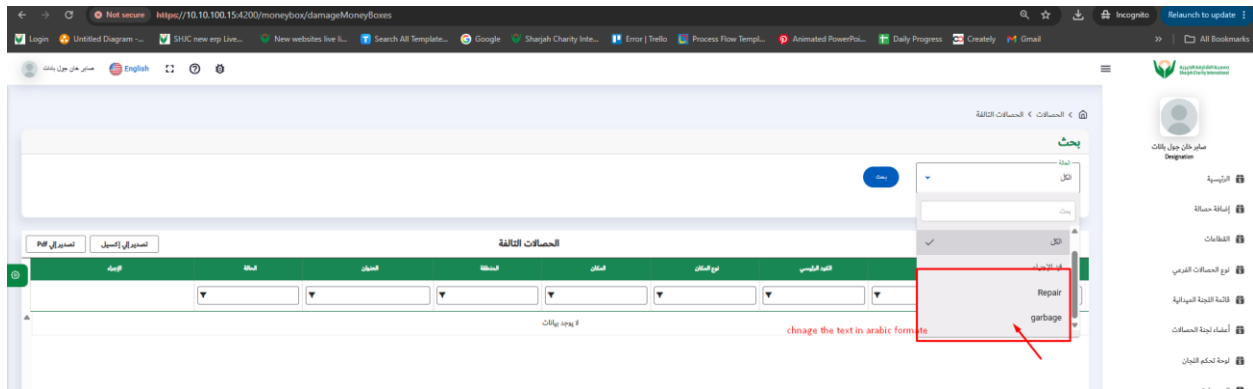

Medium – Functionality works correctly, but localization and user experience are affected.

Section Data and Selection Checkbox Missing in New Design – Bag Requests Processing Screen

URL

<https://10.10.10.154:200/moneybox/processBagRequests>

Screen/Page

Process Bag Requests / معالجة طلبات أكياس الأموال

Description

In the new design of the Process Bag Requests screen, the **Section (القطاع)** column data is not displayed in the records grid. Additionally, the selection checkbox column that exists in the old design is missing. Due to this issue, users cannot view section information and are unable to select records for further processing.

Steps to Reproduce

1. Open the Process Bag Requests screen using the URL:
<https://10.10.10.154:200/moneybox/processBagRequests>
2. Search for any available records.
3. Review the records displayed in the grid.
4. Compare the screen with the old design.
5. Observe the **Section (القطاع)** column and record selection functionality.

Actual Result

- The **Section (القطاع)** column is displayed but its data is missing/blank.
- Record selection checkboxes are not available in the grid.
- Users cannot identify the related section for each record.
- Users cannot select records for processing actions.

Expected Result

- The **Section (القطاع)** column should display the correct section data for each record.
- Selection checkboxes should be available for all records as in the old design.
- Users should be able to select one or multiple records for processing.
- Grid functionality and data visibility should match the old design.

Severity

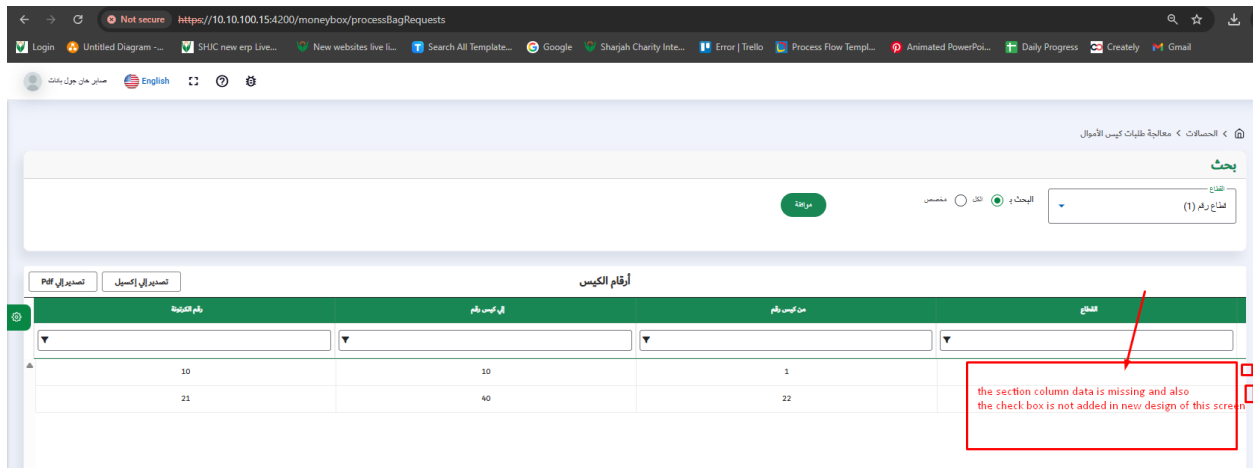

High – Missing data and selection functionality directly affect business operations and record processing.

Success Message Displayed Without Record Selection – Bag Requests Processing Screen

URL

<https://10.10.10.154:200/moneybox/processBagRequests>

Screen/Page

Process Bag Requests / معالجة طلبات أكياس الأموال

Description

On the Process Bag Requests screen, when the user clicks the **Approve (موافقة)** button without selecting any record from the grid, the system incorrectly displays a success message ("تم الحفظ" بنجاح). The system should validate that at least one record is selected before processing the approval request.

Steps to Reproduce

1. Open the Process Bag Requests screen using the URL:
`https://10.10.10.154:200/moneybox/processBagRequests`
2. Search for available records.
3. Do **not** select any record from the list.
4. Click the **Approve (موافقة)** button.
5. Observe the system response.

Actual Result

- The system displays a success message:
"تم الحفظ بنجاح" (Saved Successfully).
- No record is selected for approval.
- No validation message is shown.
- User is misled into believing an approval action was completed.

Expected Result

- The system should validate record selection before processing.
- If no record is selected, a warning/error message should appear such as:
"يرجى اختيار سجل واحد على الأقل"
(Please select at least one record.)
- The approval process should not proceed until a valid selection is made.
- Success messages should only be displayed after successful processing of selected records.

Severity

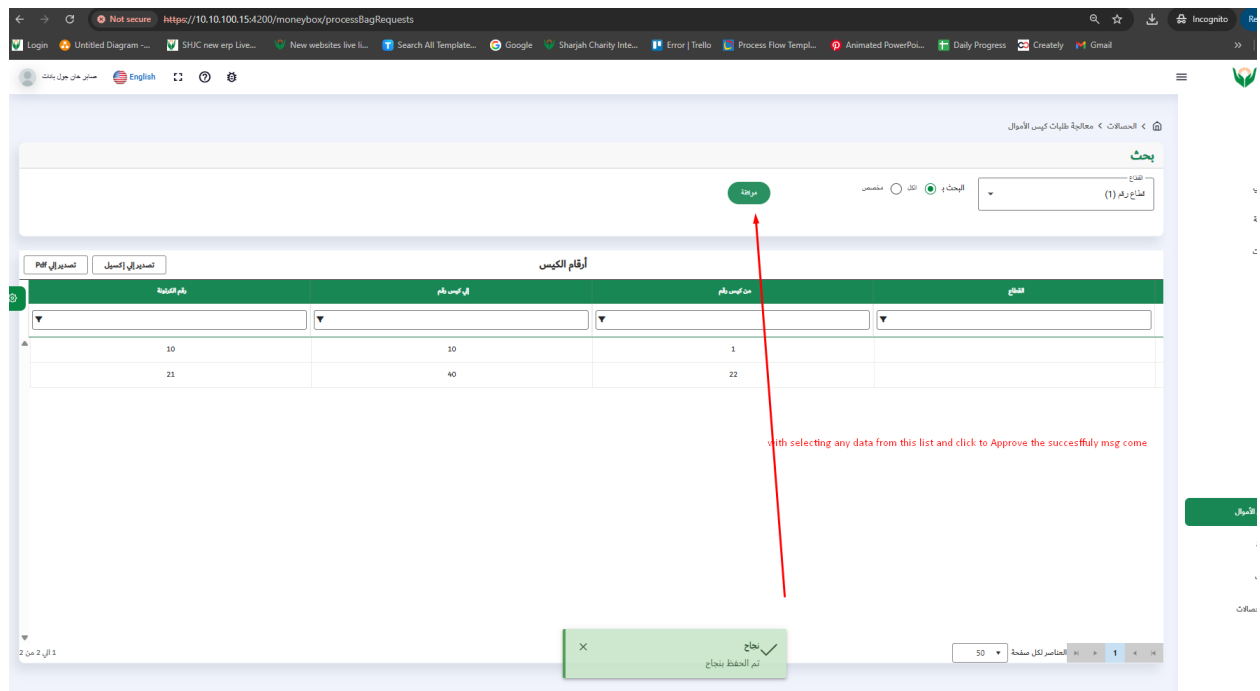

High – Incorrect system feedback may cause users to assume a transaction was processed successfully when no action actually occurred.

Priority

High

Department Column Missing in Employee Committee Report – New Design

URL

<https://10.10.10.154:200/moneybox/committeeEmployeesReport>

Screen/Page

Committee Employees Report / تقرير موظفين اللجنة

Description

In the Employee Committee Report screen, the new design appears to be missing the **Department (القسم)** column that was available in the old report. This results in incomplete employee information being displayed and creates inconsistency between the old and new report layouts.

Steps to Reproduce

1. Open the Employee Committee Report screen using the URL:
<https://10.10.10.154:200/moneybox/committeeEmployeesReport>
2. Enter a valid date range.
3. Click **Search (بحث)** to generate the report.
4. Review the report columns displayed in the grid.
5. Compare the report with the old design version.
6. Observe that the **Department (القسم)** column is missing.

Actual Result

- The report is generated successfully.
- Employee information is displayed.
- The **Department (القسم)** column is not available in the report.
- Users cannot identify the department associated with each employee record.

Expected Result

- The report should include the **Department (القسم)** column as available in the old design.
- All report columns should match the old report structure.
- Users should be able to view complete employee details, including department information.

Severity

Medium – Report functionality works, but important employee information is missing.

Record Selection Checkbox Missing in Transfer Bags Screen – New Design

URL

<https://10.10.10.154:200/moneybox/listTransfer>

Screen/Page

Transfer Bags / نقل الأكياس

Description

In the Transfer Bags screen, the record selection checkbox column is missing in the new design. Users are unable to select one or multiple records from the list for transfer-related actions. The checkbox functionality available in the old design is not present in the new screen.

Steps to Reproduce

1. Open the Transfer Bags screen using the URL:
`https://10.10.10.154:200/moneybox/listTransfer`
2. Search for available records.
3. Review the records grid displayed on the page.
4. Compare the screen with the old design.
5. Observe the area where record selection checkboxes should appear.

Actual Result

- No checkbox column is displayed in the records grid.
- Users cannot select records individually.
- Bulk or record-based transfer actions cannot be performed properly.
- Functionality differs from the old design.

Expected Result

- A checkbox column should be displayed for each record.
- Users should be able to select one or multiple records.
- Transfer operations should support record selection as implemented in the old design.
- The new design should maintain the same functionality as the old system.

Severity

High – Missing selection functionality prevents users from performing transfer-related operations efficiently.
